What is this product?

Type

You invest into a debt obligation of the category Investment Product (Bonus Certificate).

Objectives

The aim is to generally receive a fixed return ("bonus") in case of constant or slightly falling prices of the underlying. The product has a fixed maturity. The redemption will depend on the performance of the underlying. There is no entitlement to other regular income (e.g. dividends of the underlying).

If the price of the underlying remains above the barrier at all times, redemption at maturity will not be less than the bonus amount, which is equivalent to the bonus level multiplied by the multiplier. The redemption is capped at the maximum redemption amount, which is equivalent to the cap multiplied by the multiplier. If the closing price of the underlying is above the bonus level at the end of the term, the product will be redeemed at the maximum redemption amount at maturity.

If the price of the underlying reaches or falls below the barrier during the term, there will be no bonus payment. The redemption amount at maturity will be equivalent to the closing price of the underlying multiplied by the multiplier and is capped by the maximum redemption amount.

The issuer is entitled to terminate the product with immediate effect, if an extraordinary event occurs. Examples of extraordinary events include the delisting or loss of the underlying, changes in legislation, tax events and the discontinuation of the issuer's ability to carry out the necessary hedging transactions. In this case, the redemption amount may possibly be significantly below the purchase price. You also bear the risk that the product will be called in at a time unfavourable to you, and you may only be able to reinvest the redemption amount on less favourable terms.
