## What is this product?

### Type

You invest into a debt obligation of the category Investment Product (Capital Protection Note).

### Objectives

The aim of this product is to benefit from rising prices of the underlying. The product has a fixed interest and a fixed maturity. The redemption will depend on the performance of the underlying. Interest is paid independent of the performance of the underlying.

Redemption at maturity will be the Base Percentage plus the performance of the underlying multiplied by the participation rate. The participation rate determines the interest in the performance of the underlying expressed as a percentage. Performance means the percentage change in the closing price of the underlying compared to the strike price. Independent of the performance of the underlying, a minimum amount will be paid, which is equivalent to the minimum redemption rate multiplied by the principal amount.

If the listed valuation day is not an exchange business day, the next exchange business day is the valuation date.

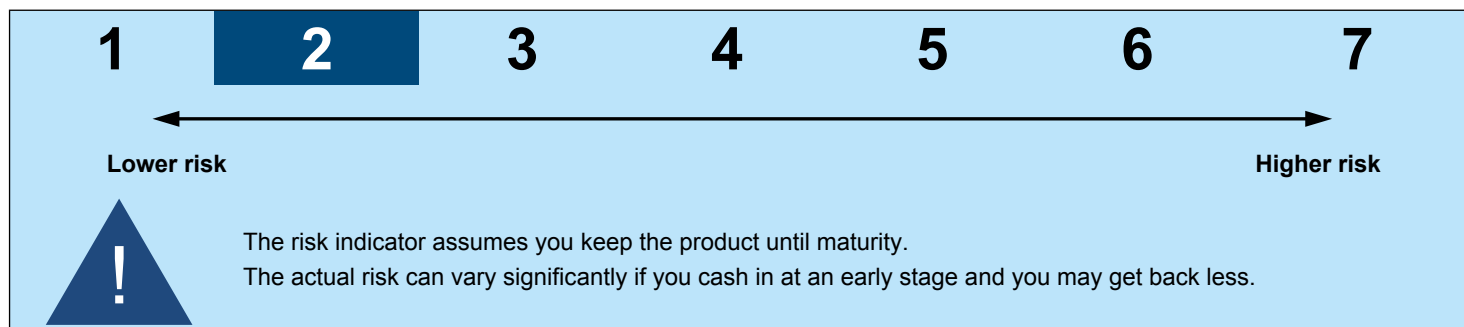

The issuer is entitled to terminate the product with immediate effect, if an extraordinary event occurs. Examples of extraordinary events include the delisting or loss of the underlying, changes in legislation, tax and regulatory events and the discontinuation of the issuer's ability to carry out the necessary hedging transactions. In this case, the redemption amount (fair market price) may possibly be significantly below the purchase price. You also bear the risk that the product will be called in at a time unfavourable to you, and you may only be able to reinvest the redemption amount on less favourable terms.

### Intended retail investor

This product is aimed at retail investors who put emphasis on a full capital protection and prefer a long-term investment horizon. The retail investor has sufficient knowledge and / or experience with financial products. The retail investor puts emphasis on capital growth.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

**Be aware of currency risk.** If the currency of the product is different from the currency of the country in which you live, you will receive payments in a different currency, so the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

You are entitled to receive back at least 100% of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain.

However, this protection against future market performance will not apply if you cash-in before maturity.

If we are not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

*Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.*

	Average return each year	20.15%	9.13%	7.03%

This table shows the money you could get back until maturity, under different scenarios, assuming that you invest 10,000 EUR.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if Erste Group Bank AG is unable to pay out?

This product is not covered by any deposit guarantee scheme. You are exposed to the risk that Erste Group Bank AG may not be able to fulfil its obligations arising from this product in the event of an insolvency (inability to pay, over-indebtedness) or from an official order ("bail-in regime"). A total loss of your invested capital is possible.

## What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10,000 EUR. The figures are estimates and may change in the future.

#### Costs over time

Investment of 10,000 EUR Scenarios	Holding period 1 year	Holding period 4 years	10/3/2030 (recommended holding period)
<b>Total costs</b>	150.00 EUR	150.00 EUR	75.00 EUR
Impact on return (RIY) per year	1.60%	0.37%	0.10%

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

#### Composition of costs

The table below shows:

- the impact per year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year			
<b>One-off costs</b>	Entry costs	0.1039%	The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
<b>Ongoing costs</b>	Other ongoing costs	0.00%	The impact of the costs that we take each year for managing your investments.

#### How long should I hold it and can I take money out early?

**Recommended Holding Period: until 10/3/2030**

The product is designed for staying invested until maturity date. The redemption of 100.00% in terms of face value only applies to the end of maturity. The price is subject to fluctuations during the life of the product, which may result in losses. It is possible to sell the product during the respective trading hours at the given stock exchanges where this security is listed.
