Magyar Nemzeti Bank is responsible for supervising Erste Bank Hungary Zrt. in relation to this Key Information Document.

This PRIIP is authorised in Hungary.

Creation Date: 24/07/2025

You are about to enter into a product, which is not simple and may be difficult to understand.

What is this product?

TYPE

This product is an OTC ("over-the-counter") derivative contract.

TERM

This product has a fixed term. It matures after 3 months.

OBJECTIVES

The product is mainly used to hedge currency risks, but it can also be used to capture movements and developments of exchange rates.

It is an individual contract between the client and the bank to exchange two amounts in different currencies.

You acquire the right, but not the obligation, to buy ("Call") the agreed currency amount ("Currency 1") at a fixed exchange rate ("Strike Price") and to sell ("Put") the equivalent amount in the other currency ("Currency 2"). For this right, you pay an option premium upfront. Since the option right can be knocked-out during the agreed term, the premium is lower compared to plain vanilla FX options.

The option right expires if the exchange rate is equal to or lower than a certain barrier (so-called "knock-out") at least once until expiry. If the barrier has not been hit, you can decide whether you want to exercise the right or let it expire. Depending on the exercise type, the option can be exercised either "American" = during the agreed term or "European" = only at the end of the term ("Expiry"). Usually, expiry is two days prior to maturity.

The example product parameters shown below are based on assumptions and/or legal requirements, and thus serve as a basis for the calculation of the exemplary performance scenarios and costs. Therefore, they can differ from your specific contract details (e.g. nominal amount, currency, term).

You buy Currency 1:	333,333.33 EUR
You sell Currency 2:	389,666.66 USD
Option Type:	EUR Call / USD Put
Exercise Type:	European
Strike Price:	1.169 EUR/USD
Barrier:	1.1618 EUR/USD
Premium upfront (Investment):	10,000.00 EUR
Maturity:	after 3 months

In case of extraordinary events the manufacturer is entitled to terminate the product early, in particular if you or the manufacturer are in default of payment. An early termination may lead to significant losses.

INTENDED RETAIL INVESTOR

The product is meant for retail clients, who

- (i) intend to keep it for the entire agreed term,
- (ii) can bear any loss incurred as a result of market movements during or at the end of the agreed term,
- (iii) have sufficient knowledge and/or experience of this or a similar product and
- (iv) want to use the product for hedging purposes or want to participate in the market performance.

What are the risks and what could I get in return?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that you will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class.

Pursuant to regulatory requirements OTC derivatives are always classified as 7 out of 7.

Be aware of the currency risk, if the product is denominated in a foreign currency. You will receive or make payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This product does not include any protection from future market performance so you could incur significant losses. If we are not able to pay you what is owed, you could incur significant losses.

PERFORMANCE SCENARIOS

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended Holding Period:		3 months
Example investment:		10,000 EUR
Scenarios		If you exit after 3 months
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress	What you might get back after cost	0 EUR
	Return	-100.0%
Unfavourable	What you might get back after cost	0 EUR
	Return	-100.0%
Moderate	What you might get back after cost	0 EUR
	Return	-100.0%
Favourable	What you might get back after cost	15,410 EUR
	Return	54.1%

In general, the scenarios show the average return per year. If the recommended holding period is less than one year, the scenarios show the potential return over the recommended holding period. Therefore, the comparability might be limited.

The stress scenario shows what you might get back in extreme market circumstances.

The scenarios represent possible outcomes, which have been calculated based on simulations using the reference asset past performance over up to five past years. This product cannot be easily terminated. If you exit the investment earlier than the recommended holding period, you will have to pay extra costs.

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Erste Bank Hungary Zrt. is unable to pay out?

You are exposed to the risk that Erste Bank Hungary Zrt. may not be able to fulfil its obligations arising from this product in the event of insolvency (inability to pay, over-indebtedness) or an official order ("bail-in regime"). A total loss of any claim for payment is possible.

What are the costs?

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount.

We have assumed:

- You get back the amount that you invested (0.0% annual return).
- 10,000 EUR is invested.

	If you exit after 3 months
Total costs	6,667 EUR
Cost impact (*)	200.0%

(*) This illustrates the effect of costs over a holding period of less than 1 year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after 3 months
Entry costs	2.0% of the nominal amount	6,667 EUR
Exit costs	2.0% of the nominal amount	6,667 EUR
These costs only apply if you exit before maturity (end of the agreed term).		

How long should I hold it and can I take money out early?

Recommended Holding Period: 3 months

The recommended holding period corresponds to the agreed term. The product is concluded for the agreed term. However, the possibility of an early termination can be agreed. An early termination may lead to significant extra costs. In this case, you will receive or pay a liquidation price based on the market value of the product and the costs and, if applicable, an additional margin.

How can I complain?

In case of any complaint regarding the person advising on or selling the product please connect with the relevant contact person at your bank or respective product distributor. Any complaint regarding the product or the conduct of the manufacturer can be submitted to Erste Bank Hungary Zrt., 1138 Budapest, Népfürdő u. 24-26. You are also welcome to send an e-mail to erste@erstebank.hu or use the website <http://www.erstebank.hu/hu/panaszkezeles>.
